

ATCO Operational Speech Discrimination Test

Dear Manager ATM Operations,

The medical certificate holder named below has recently had an audiogram that requires an operational speech discrimination test under the EASA L63, ANNEX IV PART ATCO.MED, ATCO.MED.b.080 (a), (4) (ii). Please complete the following assessment and forward it to PEL Office, Safety & Security Regulation Department.

This test should be undertaken in a noise field corresponding to normal working conditions. The test can be undertaken over several days to assess each aspect of the working task.

Name of Certificate Holder:

SCAA Licence Number:

Place of Test:

Date(s) of Test:

	Yes	No
	<i>(Tick as appropriate)</i>	
Can the subject hear RT communications satisfactorily?		
Can the subject hear RT communications satisfactorily in the presence of background noise in their own working environment e.g., equipment alarms and telephones?		
Can the subject hear flight crew voice communication satisfactorily in the presence of background noise from the flight deck/cockpit?		
Can the subject identify non-routine RT phraseology accurately?		
Does the subject's hearing loss interfere with their ability to communicate effectively with flight crew members?		
Does the subject's hearing loss interfere with their ability to communicate effectively with colleagues in their own working environment?		
In your opinion, does the subject's hearing loss interfere with flight safety?
