# State Safety Policy

The Seychelles Civil Aviation Authority (SCAA), on behalf of Seychelles, promotes and regulates the safety of civil aviation within the country. Seychelles is committed to developing and implementing effective strategies, regulatory frameworks, and processes to ensure that aviation activities under its responsibility achieve and maintain the highest practicable level of safety performance across the national aviation system

To this end, Seychelles commits to:

1. Adhere to International Standards
   Establish and maintain national regulations and requirements aligned with the Standards and Recommended Practices (SARPs) and procedures of the International Civil Aviation Organization (ICAO).

2. Adopt a Performance-Based Approach
   Adopt a data-driven and performance-based approach to safety regulation, oversight, and decision-making where appropriate.

3. Apply Risk-Based Safety Management
   Identify safety trends and emerging risks within the aviation industry and adopt a risk-based approach to address areas of greatest safety concern or need.

4. Monitor Safety Performance
   Continuously monitor and measure the safety performance of the Seychelles aviation system through State-level aggregate safety performance indicators (SPIs) and service providers' safety performance indicators, in support of achieving the State's Acceptable Level of Safety Performance (ALoSP)

5. Foster Industry Collaboration
   Collaborate and consult with aviation stakeholders to address safety issues and continuously enhance safety outcomes across the system.

6. Promote a Positive Safety Culture
   Promote good safety practices and a positive safety culture within the industry based on sound safety management principles, including the promotion of a just culture that encourages the reporting of safety occurrences without fear of undue punitive action.

7. Facilitate Safety Information Sharing
   Encourage and support the collection, reporting, analysis, sharing, and exchange of safety information among all relevant aviation organizations and service providers, with the intent that such information is protected and used solely for safety management purposes.

8. Ensure Adequate Resources
   Allocate sufficient financial and human resources to support effective safety management and oversight.

9. Develop Competent Personnel
   Ensure that personnel are equipped with the necessary skills, training, and experience to effectively discharge their safety management responsibilities.
